

HACKER PROTOCOL BOOTCAMP

HPB // STUDENT REQUIREMENTS DOCUMENT // 2025

// OBJECTIVE

Ensure all students operate within a consistent environment and follow a structured approach to learning.

THIS BOOTCAMP PRIORITIZES

- System understanding
- Practical execution
- Independent thinking

// REQUIRED SETUP

All students must have the following before starting:

1. WEB BROWSER

- Any modern browser — Google Chrome recommended
- Must support Developer Tools

2. TERMINAL ACCESS

- Linux / Mac: Default terminal
- Windows: Git Bash or equivalent

3. CODE EDITOR

- VS Code (recommended)
- Used for notes and file interaction

4. NOTE-TAKING SYSTEM

- Markdown, Notion, Obsidian, or plain text
- Must be used consistently

// REQUIRED SKILLS (BASELINE)

Students are expected to:

- Follow step-by-step instructions
- Execute basic terminal commands
- Take and organize screenshots
- Maintain structured notes

No prior cybersecurity knowledge is required.

// WORK STRUCTURE

Students progress through: **Phases** → **Rooms** → **Steps**

EACH ROOM CONTAINS

- Walkthrough text
- Step-by-step actions
- Supporting screenshots

// EXECUTION RULES

Students must:

1. Follow steps in order
2. Do not skip actions
3. Replicate all steps locally
4. Observe outputs carefully
5. Take notes during each room

// SCREENSHOT DISCIPLINE

- Capture key actions and outputs
- Name screenshots clearly
- Maintain sequential order

NAMING CONVENTION

01-command.png

02-output.png

03-result.png

Screenshots must reflect actual execution — not copied content.

// NOTES REQUIREMENT

Each student must maintain a personal "Hacker Notebook".

NOTES MUST INCLUDE

- Observations
- Assumptions
- Key concepts
- Mistakes and corrections

No passive learning.

// LEARNING RULES

- Understand before moving forward
- Practice consistently
- Ask questions when stuck
- Think in systems: input → process → output

Memorization is not sufficient.

// TOOL USAGE POLICY

ALLOWED	NOT ALLOWED
✓ Browser	✗ Advanced hacking frameworks
✓ Terminal	✗ Automated bypass tools
✓ Nmap	✗ Paid / unnecessary software
✓ Code editor	

// ETHICS POLICY

PERMITTED	NOT PERMITTED
✓ Learning	✗ Attacking real systems
✓ Practice	✗ Unauthorized testing
✓ Skill development	✗ Illegal activities

Violations result in immediate removal from the bootcamp.

// PERFORMANCE EXPECTATIONS

- Complete all rooms
- Replicate walkthroughs successfully
- Demonstrate understanding through notes
- Apply knowledge in later phases

// FINAL STANDARD

By the end of the bootcamp, students should be able to:

- Break down systems logically
- Understand how applications communicate
- Use basic tools effectively
- Approach problems with structured thinking

// BOTTOM LINE

EXECUTE. OBSERVE. THINK.

No shortcuts. No guessing. No skipping. //
